

To the FCC chairpersons,

I am writing this email to say that I am opposed to the upcoming FCC vote to allow media companies to expand the number of stations they can own. I can't find a station on the dial where I can find political views similar to mine, or listen to music similar to the music I own. I don't have an internet connection which will allow me to listen to other media, and a faster service is not offered where I live.

I also believe that information is key to a democracy. Maybe that is the reason that so many Republicans want the media in fewer hands. That way it is easier to control. This new proposal is simply un-American and as unpatriotic as off shore tax havens. Shame on all the crooks, such as Michael Powell in my government.

I'm sure that you already have access to this information, but as a reminder, I vote, I'm educated and my income is above average.

Sincerely,

Jack Kolze
